

Stainless Steel Model

For over 30 years we have been the leader in safety and comfort for your dog. Our 2009 models continue to lead the way with LED lighting technology for increased visibility and safety. LED lights also use less energy and have a 100,000 hour service life.

Our stainless steel door hinges are full length for additional strength and our stainless steel door latches are absolutely the strongest and longest lasting latch available today. Our trailers are built to take daily use with minimal maintenance. Our utmost priority is still the ultimate safety of the dogs. Our aggressive ventilation system keeps your dogs comfortable in all climates and our superior body strength keeps them safe under all conditions.
